Welcome TO THE 2025 CUDLOBE BULL SALE

AS WE CLOSE OUT 2025, IT WILL CERTAINLY BE REMEMBERED AS A YEAR LIKE NO OTHER. WHAT BEGAN WITH FEARS OF ANOTHER DROUGHT TURNED INTO A SEASON OF RECORD MOISTURE, OUTSTANDING CROP YIELDS, AND CALF PRICES BEYOND WHAT WE EVER IMAGINED. OF COURSE, THE YEAR BROUGHT ITS SHARE OF CHALLENGES – TARIFFS, STORMS, AND THE USUAL UPS AND DOWNS OF AGRICULTURE – BUT AS RANCHERS AND FARMERS, RESILIENCE IS IN OUR NATURE.

THE CUDLOBE INFLUENCE SALES ONCE AGAIN SHOWED STRONG RESULTS, AND WE WANT TO EXTEND SINCERE CONGRATULATIONS TO OUR CLIENTS ON THEIR CONTINUED SUCCESS. A SPECIAL CONGRATULATIONS GOES TO OUR LONGTIME FRIENDS AND BUYERS, CROSS CATTLE CO. (THE CROSS FAMILY), ON RECEIVING THE CERTIFIED ANGUS BEEF® COMMITMENT TO EXCELLENCE AWARD – A WELL-DESERVED RECOGNITION OF THEIR DEDICATION AND HARD WORK.

IT'S ALSO BEEN AN EXCITING YEAR FOR THE BOLDUC FAMILIES, WITH TWO WEDDINGS, NEW MEMBERS WELCOMED, STRONG CROPS, AND WHAT WE TRULY BELIEVE IS THE BEST SET OF SALE BULLS WE'VE EVER RAISED. WE WARMLY INVITE YOU TO STOP BY THE FARMS ANYTIME TO SEE THE BULLS FOR YOURSELF – THE COFFEE IS ALWAYS ON, AND THERE'S ALWAYS TIME FOR A VISIT.

EPD PERCENTILES FOR 2025 CUDLOBE SALE BULLS AVERAGE

Each Individual Bull that Cudlobe Angus is selling today has its own graph. Go to www.cdnangus.ca and you can take a look at each of them.

ANOTHER REASON WHY CUDLOBE BULLS ARE LEADING THE WAY IN THE ANGUS INDUSTRY

HOW TO READ THE SALE LOT INFORMATION

EPD DESCRIPTIONS FROM THE CANADIAN ANGUS ASSOCIATION

Calving Ease Direct (CE): describes the percentage of expected unassisted births when a bull is exposed to first-time heifers. The higher the number, the higher the probability that first-time heifers bred to the bull in question will calve with no assistance. The EPD predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW): describes in pounds the difference in expected progeny weight, on average. A bull with a BW EPD of +4 will, on average, sire calves that are 2 pounds heavier than a bull with a BW EPD of +2 (given equal management).

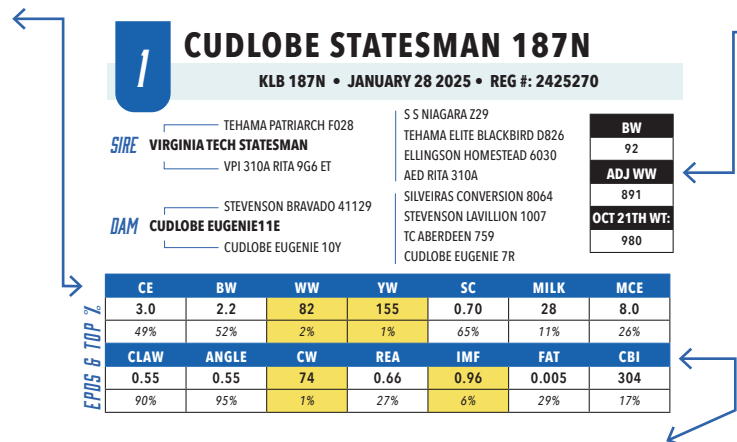

Weaning Weight (WW): describes in pounds the difference in expected weaning weight in progeny, on average. WW EPD is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. A bull with a WW EPD of +50 will sire calves that are, on average, 20 pounds heavier at weaning than a sire with a WW EPD of +30 (given equal management).

Yearling Weight (YW): describes in pounds the difference in expected yearling weight in progeny, on average. YW EPD is a predictor of a sire's ability to transmit post weaning growth to his progeny compared to that of other sires. A bull with a YW EPD of +100 will sire calves that are, on average, 30 pounds heavier at weaning than a sire with a WW EPD of +70 (given equal management).

Scrotal Circumference (SC): Expressed in centimetres, predicts differences in sons' scrotal size. Higher SC is linked to earlier puberty and improved fertility in progeny.

Milk: Indicates the pounds of calf weaning weight due to a daughter's milk and mothering ability. Moderate levels are ideal based on herd environment and management.

Calving Ease Maternal (MCE): describes the probability of not requiring assistance when a bull's daughters calve for the first time. The higher the EPD, the higher the probability that a bull's daughters will not require assistance at calving time.

Raw BW: The calf's actual weight at birth.

Adj 205 WW: Weaning weight adjusted to 205 days for age and dam effects.

Raw Oct 21 Wt-or-Recent ADG: Actual mid-October weight or average daily gain from birth to mid-October, showing real growth performance.

Claw Set (Claw): is expressed in units of claw-set score, with a lower EPD being more favourable indicating a sire will produce progeny with more functional claw set. Ideally, toes are symmetrical, even and appropriately spaced.

Foot Angle (Angle): is expressed in units of foot-angle score, with a lower EPD being more favourable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Carcass Weight (CW): is expressed in pounds and is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires. A bull with a CW EPD of +30 will sire calves that, on average, will result in 10 pounds more hot carcass weight than the progeny of a bull with CW EPD of +20.

Marbling (IMF): describes the marbling potential of calves from one bull compared to the calves from another bull, given the same management. This EPD is expressed as the difference in grade score. Given the same management, the calves from a bull with a Marb EPD of 0.6 will marble ½ a grade score better than the calves from a bull with a Marb EPD of 0.1.

Ribeye Area (REA): describes in square inches the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat): expressed in inches, describes the differences in back fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

The Canadian Balanced Index (CBI) combines multiple EPDs into a single dollar-value figure reflecting a sire's expected impact on profitability. It balances growth, maternal, and carcass traits to help producers select bulls that maximize overall economic return.

Top %: Shows how an animal ranks within the breed for a specific trait – a lower percentage means higher genetic merit (e.g., Top 1% is elite).

Justified came to Cudlobe West after being purchased as the high selling bull in Stevensons 2023 fall bull sale. "Darrell" as we call him checked all the boxes we were searching for in a new walking herd bull. He is a big framed bull with excellent Production and Carcass EPDs as well as some other things we were hunting for like excellent Foot and PAP numbers. His mother Down T Lucy 003 is a major donor cow at Stevenson's and has produced many bulls and females for their program. Through AI and natural service we calved 72 of his sons and daughters averaging 83 lbs BW. If your looking for big growth calves with moderate birth check out his 22 sons in the sale.

Here is a heck of a way to start a brand-new sire group. This guy has the look of a herd bull both on paper and phenotypically. Moderate birth weight (76lbs) and huge actual performance (heaviest weaning calf from us) make this guy worth the drive. His mother is a beautiful 3 yr old ET daughter of Upgrade x UF 47E who is a designated Premiere Dam in the angus herd book and classified as a Elite dam in Herdtrax. She is moderate framed with excellent feet under her. This guy checks all the boxes if you're looking for your next herd bull.

Take a look at these 2 flush calves from Justified and UF 6K. This cow has been a standout from when she was a heifer calf and continues to be one in our donor cow pen. She is a Big framed Fireball sired female that always provides moderate BW but big-time performance and carcass in her calves. Both guys are easy picks to add to your herd bull battery.

Now here is a excellent thick bodied bull that has the look and the EPD's to go with it. Off a very nice sized Ashland daughter he gained over 3lbs a day from birth to weaning and had a 205 day index of 112. This guy will put some meat on your calves for when they hit the sale ring in the fall.

**CUDLOBE INFLUENCE FEEDER SALE 2025**

2025 marked 12 years of marketing Cudlobe Influence Feeder Cattle through our video sale. This is the longest running genetically influenced calf sale in North America!

There were two sales this year; one on June 19th and the other sale was on October 6th. The decision was made by a group of our producers to mitigate some risk and market some of the cattle in June instead. There was some concern with the dry weather conditions, as well as some uncertainty with what may take place with our neighbours to the south.

The June sale had majority of steer calves and was very well supported. It was an opportunity to lock in some of the values that we were seeing at that point in time. Between the two sales, approximately 2500 calves were sold with consignments from *Shepard Creek Ranch, Mat & Addy Bolduc - Cudlobe West, Niznik Ranches, Roy & Karen Hall, Torkelson Farms, Curtis, Heather, Jamie & Stephanie Harbinson, Prairie Skies, Alfalfa LTD. and Giles Ranch.*

Over the last few years there has been an increase in desire for these genetically influenced calves. This is evident in the repeat clients competing for the high performing healthy calves.

The commitment of these ranches to participate in this sale has been amazing. The product they deliver is second to none, giving them the reputation that this sale is one you don't want to miss. The consistency, quality, performance and health of the calves continue to top the market.

They have brought a premium price for several years. It is an honour and a privilege to work with Cudlobe Angus, Cudlobe West and the ranchers that believe in and support this sale. We look forward to much more continued success in the years to come!

One of the most sought-after sires in 2023, he is the elite maternal package as he ranks near the top of the breed for \$M, \$W, HS and HP offering exceptional growth. A new genetic profile to the Cudlobe herd while improving both phenotype and foot quality. 5 sons and 5 favorites that made lots of friends throughout the summer.

CUDLOBE ANGUS - HERD HEALTH

LARRIKIN VETERINARY SERVICES LTD.

Mailing Address: c/o 284 Cambridge Cres Strathmore, AB T1P 1S1
 t. (403) 983-0771
 email: vets@larrikinvets.ca website: www.larrikinvets.ca

Larrikin Veterinary Services is responsible for providing breeding soundness evaluations (BSE) on Cudlobe Angus sale bulls and helps oversee the herd health program. The herd health program is focused on preventative medicine (vaccinations, nutrition, husbandry) which ensures the animals reach top production levels with optimal health and comfort.

Bulls receive multiple vaccines post weaning to help ensure optimal health and reproductive soundness. A modified live vaccine (Express® FP5-VL5 - Boehringer Ingelheim) which provides protection against Infectious Bovine Rhinotracheitis (IBR), Bovine Viral Diarrhea Virus (BVDV), Bovine Respiratory Syncytial Virus (BRSV), Parainfluenza 3 Virus (PI-3), Campylobacter fetus (Vibriosis) and Leptospirosis (Leptospira canicola, L. grippityphosa, L. hardjo, L. icterohaemorrhagiae, and L. Pomona) is given to the bulls in the spring at the time of the BSE. They also receive a bacterin-toxoid vaccine booster (Ul-trachoice® 8 - Zoetis) which provides protection against eight clostridial bacterial strains. To help prevent and

reduce severity of foot rot, bulls receive an initial and booster bacterin vaccine (Fusogard™ - Elanco) providing protection against Fusobacterium necrophorum in the fall and an additional booster in the spring at the time of the BSE.

A full BSE is done on each bull prior to them leaving the farm. The BSE is an in-depth exam that evaluates overall physical soundness, assesses testicle size and health and ensures normal reproductive anatomy with rectal palpation. A semen sample is collected and evaluated chute side to ensure adequate density, motility and morphologically normal sperm. It is a busy few days but this 'whole picture real time assessment' of each bull ensures that only those meeting all the necessary requirements are lucky enough to meet the ladies!

Now here is an example of what you hope for when you flush a cow. 8 full brothers that are like peas in a pod. JB 13H is a beautiful moderate framed cow out of Southern Charm that has a true angus look to her. She matched perfectly with Man in Black to produce this set of calves. Both mother and sire are known for excellent foot quality, and you can see it in every one of these calves. These bulls are true full brothers in the pen and whether you want to take them all home or just a couple they will add consistency in your calf crop.

Top Gun is a blockbuster of a bull that has it all. Top Gun is a powerful bull that could only be topped by his sequel! One of the most talked about bulls in Schiefelbein's 2023 sale and a crowd favorite that sold for \$35,000. A bull picked for his great performance, carcass merit and docility profile paired with incredible depth of side and pin width. One of the most talked about sire groups post field day.

Here is a sharp looking Saluda son that is easy to get along with. From an excellent performing D10 sired female who put it all into him this summer. 3 lbs a day of gain from birth to weaning and he posted a 205 index of 112 at weaning. Look at his Claw and Angle EPD's and let me tell you he is as strong footed as those numbers say he is. You'll love this calf in person.

Every year I sell one that I say we should've kept for our own heifers and this guy is the one. He is a Saluda son that goes back to an Iconic 3 yr old cow that is from the premier dam UF 47E. She is a true moderate framed angus cow that produced 3.22 lbs of gain from birth to weaning and weaned this tank off with a 205 index of 116. Big time calving ease and performance means this guy will add many things to your calf crop and more hours of sleep for you at calving.

Now here is a guy with a major momma cow behind him. UF 47E is currently a main cow in our donor program at Cudlobe West and has produced 9 working daughters and 2 working granddaughters in the cow herd. She is a premier dam in the Angus herd book and an Elite dam within Herdtrax. This guy was bred for success on both sides and I guarantee you'll drive along ways to find a better footed calf and cow.

Winchester was the top-selling feature bull from the 2022 Poss sale. He's one of Clarity's highest \$C sons and a maternal brother to Poss Rawhide, while adding a productive and proven donor dam to his portfolio.

A big footed, bold ribbed, and deep bodied bull with genetic, phenotypic, and maternal merit to be captured in one package. This sire group is the soggiest, deepest sided bulls in the sale. If you are looking to add a little side and performance to your herd make sure to have these boys marked.

In 2023 we first used Justification as a new outcross AI Heifer bull and the last 2 calf crops haven't disappointed. Justification is quickly growing in popularity as a for sure heifer bull with lots of growth and carcass, to go with his incredible foot and leg structure. These 8 sons in the sale are all heifer safe and will look top notch in the spring.

Good looking 76lbs BW Justification son here. This guy runs some pretty big performance EPD's from his Three Rivers ET mother. The flush she is from produced 6 replacement heifers for us so this guy has the potential to add some exciting heifers into your herd.

**CUDLOBE WEST - HERD HEALTH**

Cow/Calf Health and Management Solutions (CCHMS) collaborate with Cudlobe Angus West to manage their entire purebred and commercial herds through an integrated and comprehensive health, and production management program. Detailed data is collected on each individual at key health and production points and kept in a secure web-enabled database (Telus Animal Record Management (Formerly called Herdtrax®)). Together, we continually monitor and audit this data to improve the health, welfare, and efficiency of the entire operation. Data is shared with multiple agencies to build on industry initiatives. Cudlobe Angus West and the Bolduc family continually strive to improve the herd by linking the chute-side and field data through genomic parentage testing, the relentless pursuit of pre-harvest ultrasound carcass data, and targeted breeding strategies. The proof is in the lot close-outs and functional longevity of adult cattle. All of these things culminate to improve the likelihood of success as local genetics move to new challenging environments.

Disease Prevention

Cudlobe Angus West follows a detailed vaccination program:

- Calves are vaccinated within the first 10 days of life:
- IBR/PI3/BRSV (MLV) – Inforce 3® (intranasal)

Calves are vaccinated in the spring prior to pasture turnout with the following:

- IBR/PI3/BRSV (MLV) – Inforce 3® (intranasal)
 - BVD (MLV) and Mannhaemia hemolytica – One Shot® BVD
 - 7 way Clostridial and Histophilus Somnus – Ultrabac® 7/Somnubac®
- Calves are vaccinated at weaning with the following:
- IBR/PI3/BRSV/BVD (MLV) and Mannhaemia – Bovi-Shield® GOLD One Shot®
 - 7 way Clostridial and Histophilus Somnus – Ultrabac® 7/Somnubac®
 - Parasite Control – Ivermectin.

Replacement heifers are vaccinated pre-breeding:

- IBR/PI3/BRSV/BVD (MLV) – Bovi-Shield® GOLD FP®5 (Fetal Protection)

Cows, bred heifers, bulls are annually vaccinated post-breeding:

- IBR/PI3/BRSV/BVD (Killed) – CattleMaster® GOLD FP®5 (Fetal Protection)

Bulls prior to delivery have been vaccinated and treated with the following:

- Fusobacterium Necrophorum – Fusoguard™ (footrot and liver abscess vaccine)

- Two doses given twice 60 days apart

- Lice Control – Permethrin

Bulls prior to the delivery will be boosted, and ready for turnout:

- IBR/PI3/BRSV/BVD – Bovi-Shield® GOLD FP®5

Breeding Soundness Examination

Each bull has passed an extensive Bull Soundness Examination which includes soundness of structure, palpation of testis and internal sex glands, scrotal circumference, examination of the penis as well as verifying sufficient sperm motility and morphology. Bulls that are considered to be Satisfactory if they have passed the above criteria at some point in time. [However, traditional measures to assess semen quality often provide inconsistent results in individuals due to a variety of environmental factors and may not always correlate to service capacity. Re-evaluating these bulls closer to breeding season or using genomic parentage to calculate service capacity is a more reliable way to identify bulls sufficient for breeding].

CCHMS is proud to work with Cudlobe Angus West and if there are any questions please contact me and I can always find the time to talk about cows, bulls and the ever-evolving cattle industry.

Congrats on another successful year!

Now this guy is a bull. He has been a stud in the pen and he knows it and his numbers are proving it. Posting a 5lbs ADG since weaning he has really turned it on since hitting the pen. This guys mom is a favorite 38 Special daughter that is easy to look at and has excellent feet under her. She herself is a daughter of the premier Dam UF 94u who has 6 direct daughters still milking in the herd.

Justified came to Cudlobe West after being purchased as the high selling bull in Stevensons 2023 fall bull sale. "Darrell" as we call him checked all the boxes we were searching for in a new walking herd bull. He is a big framed bull with excellent Production and Carcass EPDs as well as some other things we were hunting for like excellent Foot and PAP numbers. His mother Down T Lucy 003 is a major donor cow at Stevenson's and has produced many bulls and females for their program. Through AI and natural service we calved 72 of his sons and daughters averaging 83 lbs BW. If your looking for big growth calves with moderate birth check out his 22 sons in the sale.

Thick calf here to start off this next set of Justified sons. He is out of a very deep bodied, good footed 6B Objective cow that is a Gold on her Herdtrax production so far. Putting out a 4.7 lbs ADG since weaning this guy is really growing and looks good.

The high seller out of the 2022 Stevenson Angus Spring Sale. Icon was purchased due to his complete package. He possesses a tidy build, with a long spine and a correct solid foot at the ground. Furthermore, he is ranked in the top 10% for calving ease and birth weight, feed efficiency, docility, claw, and carcass EPDs. Bulls like this do not come along very often and we are happy to have him as our main heifer bull and walking bull. 150 Calves with an average BW of 74 lb. This set of bulls is everything we had hoped for when we purchased him.

One of the top Marbling EPD sires available from ORigen. Baldrige Versatile is the highest marbling animal ever produced in the Baldrige Performance Angus program and he sold to a progressive group of Angus breeders for \$250,000. The Versatile 2 year olds look like they are going to be an impressive set of cows with a great maternal look, beautiful udders and ideal teat placement.

- LAST CHANCE from Dyce's favorite cow and a heifer bull.
- It was a hard year for Dyce with this Canadian Angus Premier Dam giving us her last calf and it was a bull calf. Dyce's sadness is your gain.
- #1 Functional Longevity EPD
- Top 30% docility, fat, and heifer pregnancy EPDs.

Beautiful high calving ease bull here. 76 lbs actual and high CE and low BW makes this guy an easy choice for those replacement heifers. From a big deep D10 daughter his calves will come small and then grow hard to keep your weaning weights up.

These versatile calves are consistent, and this guy is no different. His 74 lbs actual BW match up perfectly with his EPDs. Excellent carcass weight on this guy. His mother is a fancy made ET daughter out of the uf 40f cow and Three Rivers so you know he's got some power behind him.

Curvebender deluxe starting out with a 74 lb BW performing to an 840 lb 205-day weight. Extra body and mass with "pounds in all the right places". This EPD superstar donor dam sports an excellent udder with small teat size. Huge calving ease numbers with a lot of Top 10% in the Industry across the board. This sire group proved to be the growthiest calves in last year's sale.

Now here is a calf that was bred for success. His moderate framed Weigh Up mother is a premier Dam in the angus herd book and is platinum in Herdtrax. This calf will make the 5th bull she has had in the sale and the 2 daughters she was had are both currently active in the cow herd. This guy is bred to be a rock star on paper and in real life.

Big long stretchy ET son of Saluda here. Beautiful set of EPDs with lots of good things from his foot to carcass numbers. Uf 14D has been a standout donor cow in our program and had produced many sale bulls and replacement heifers. Named a premier dam in the angus herd book and classified platinum in Herdtrax. She is an excellent footed cow sired by Tour of Duty and it shows in this calf.

Justified came to Cudlobe West after being purchased as the high selling bull in Stevensons 2023 fall bull sale. "Darrell" as we call him checked all the boxes we were searching for in a new walking herd bull. He is a big framed bull with excellent Production and Carcass EPDs as well as some other things we were hunting for like excellent Foot and PAP numbers. His mother Down T Lucy 003 is a major donor cow at Stevenson's and has produced many bulls and females for their program. Through AI and natural service we calved 72 of his sons and daughters averaging 83 lbs BW. If your looking for big growth calves with moderate birth check out his 22 sons in the sale.

Good looking Justified calf here. Moderate Birth weight on this guy will give you lots of options to use him. Out of a moderate framed Weigh Up cow that always puts out. This guy was gaining a solid 3lbs ADG from birth to weaning.

Now here is a calf bred for longevity. His mom hasn't missed in 14 years and is classified as platinum in Herdtrax. She is a TC Total daughter and boy we couldn't be prouder the way she has stood up producing either a sale bull or replacement heifer every year. This calf will build your herd with some excellent performance females.

Focus 55 needs no introduction to many of you but we will introduce him again. 55 is a top-notch calving ease bulls that was owned with Stevenson Angus and has left a lasting maternal impact on our herds. He was our first Pathfinder Sire with the American Angus Association and is an Elite sire in the Canadian herd book. We have always said he was too good to not use again, and these 3 calves are the proof.

Oh boy here is a retro calf. We used 55s on some heifers this year just see if he was as good as we remembered and he didn't disappoint. Look at this guy's EPD profile and he just screams heifer bull. 70 lbs actual birth weight on this guy and with that pedigree you know he will be the real deal heifer bulls.

Here's Bruce! This guy was raised and shown by Merrit on the side of his 2-year-old heifer. He is an excellent heifer bull prospect with a huge side of marbling to add to your herd. If you're looking for the whole package in a heifer bull, then Bruce is your man.

One of the first carcass bulls we used here at Cudlobe. Download was the lead-off and top carcass Waylon son in the 2013 Baldridge Bros. Bull Sale in Nebraska and the most docile bull ever raised by Jud Baldridge. A soggy, high performance Waylon son with half the BW EPD of his sire with very close to the WW credentials of his popular sire.

Sure fire calving ease and carcass quality with added performance and reduced intake. He is a double digit Calving Ease EPD with top 5% growth for a big time curve bender spread. Offers a combination of Marbling and Rib Eye Area EPDs that is unmatched by any other active or non-parent sire in the Angus breed today. We chose to flush the 138G donor dam with impeccable feet and impressive longevity. Last Fireball calf to sell.

Top Gun is a blockbuster of a bull that has it all. Top Gun is a powerful bull that could only be topped by his sequel! One of the most talked about bulls in Schiefelbein's 2023 sale and a crowd favorite that sold for \$35,000. A bull picked for his great performance, carcass merit and docility profile paired with incredible depth of side and pin width. One of the most talked about sire groups post field day.

Justified came to Cudlobe West after being purchased as the high selling bull in Stevensons 2023 fall bull sale. "Darrell" as we call him checked all the boxes we were searching for in a new walking herd bull. He is a big framed bull with excellent Production and Carcass EPDs as well as some other things we were hunting for like excellent Foot and PAP numbers. His mother Down T Lucy 003 is a major donor cow at Stevenson's and has produced many bulls and females for their program. Through AI and natural service we calved 72 of his sons and daughters averaging 83 lbs BW. If your looking for big growth calves with moderate birth check out his 22 sons in the sale.

TERMS AND CONDITIONS

The cattle in this sale sell under the Canadian Angus Association's Breeder's Guarantee Guidelines.

BUYER'S RISK

The risk of loss and injury of each animal passes to the buyer as soon as the bull is sold. Buyers are responsible for obtaining their own insurance should they so desire. The seller is obligated to ensure that sold animals are fed and cared for until delivery.

PAYMENT TERMS

1) Full Payment on Sale Day
-or-

2) Half Payment due on Sale Day, Remainder due upon Delivery

BULL WINTERING AND DELIVERY

- Wintering provided free until spring delivery can be arranged at the seller's convenience.
- Free Delivery to Western Canada (BC, AB & SK) and the Pacific NW States (Oregon, Idaho, Montana, North Dakota)
- We guarantee that each bull will be delivered in satisfactory condition with a satisfactory semen test.

TRANSFERS

- Registration papers will be transferred when final payment has been made.

SEMEN COLLECTION

The seller reserves the right to collect semen from any sale bull for in herd use only prior to delivery. Semen collection for the buyer can also be arranged prior to delivery at the buyer's expense.

BREEDING GUARANTEE

Bulls are guaranteed to be a breeder for 90 days after initial turn out into the buyers' herd, except for:

- Animals that suffer injury or disease following delivery
- Animals subjected to gross negligence or willful misconduct on the part of the buyer.

A bull that settles a cow by natural service and has a satisfactory fertility test performed by a mutually agreed upon licensed veterinarian will be considered a breeder.
