WELCOME TO THE 2023 EDITION OF THE REAL BULLS FOR REAL COWBOYS

They tell us it is climate change but it feels like we are living on the Edge of Tomorrow. Spring and summer was a repeat of the last four years – dry and hot. Water and grass are short. Hay prices are still high. All that being said optimism still thrives as calf, cull cows and bull prices are all high. We even heard an example from one client who's 2015 purchase, Lot 150, after 7 years of use returned more at harvest than the original purchase price. The Cudlobe Influence calf sale was the largest ever with record prices.

While Cudlobe has felt the pains of the last four years of drought we have also been humbled this last year being honored by the Beef Improvement Federation (BIF) as one of North America's top Seedstock producers. David was also humbled to receive the BIF Pioneer award. The goldmine that is the Cudlobe cow herd continues to do its job being the factory that continues to carry any new genetics we use. With 7 new sires we continue to see what the Cudlobe cow herd can do with this being the best set of bulls to date.

We are excited to once again welcome you to both farms prior to the sale for a look through the bulls and lunch with the sale set to be at the Stavely Community Hall at 3:00pm.

The Families of Cudlobe

WE ENCOURAGE EVERYONE TO COME LOOK AT THE BULLS AT THE FARMS BEFORE SALE

P.S.

Consider the uniqueness of pedigrees offered and of course these are **REAL BULLS FOR REAL COWBOYS** with great information **PROFILES!**

OBI LIVESTOCK LTD. WELCOME 2023

The families of Cudlobe once again have presented to you a very uniform set of Carcass Leading bulls for you to evaluate. This sale is one not to miss with breed leading genetics being offered to you. The data gathered of these cattle herds is simply outstanding with all the available tools being utilized. The Cudlobe name will always be acquainted with Carcass and Profitability.

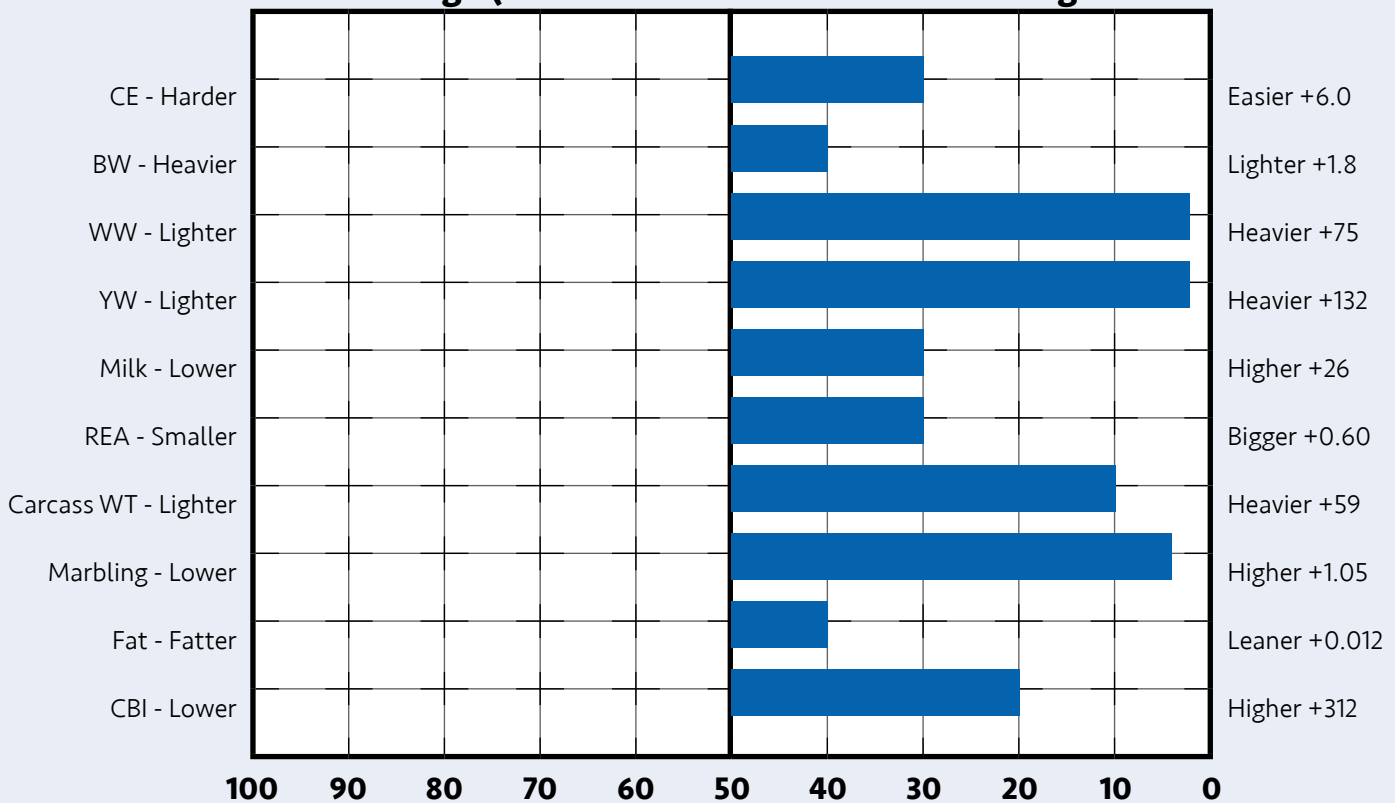

The sale offering continues to evolve at Cudlobe with New A.I. sires continually being used along with top end walking bulls the families feel are instrumental in their product. The summer tour hosted this year was another huge success with seeing the brood cows that these bulls selling are out of, what a powerful and uniform set of females. As usual hospitality was at its finest that day. Also, I attended the Cudlobe Influence Feeder Sale this past October and the customers that sold cattle day were walking away very satisfied. Huge congratulations to all involved.

The sale will be at the Stavely Hall like in 2021 and will start at 3 PM and will be a video sale. This will give you plenty of time to go to each of the farm sale day and do a final analysis of the bulls. Great Cudlobe hospitality with occur all day with a supper being served after the last lot sells. These families sure do take care of you, their customer, with 100% Satisfaction. That means everything nowadays, feeling confident you can buy into a program that has your back.

I am very proud to be working with the families of Cudlobe. OBI is here to help you with your selections and will be at the farms the day before and sale day if you need a hand on the phone or helping find your next walking bull or bulls.

See you Sale Day,
Mark Holowaychuk
OBI Livestock Ltd.

EPD Percentiles for 2023 Cudlobe Bulls Average (Based on Fall 2023 EPDs Black Angus)

50th Percentile is the Breed Average EPDs for 2022 Born Calves

Each Individual Bull that Cudlobe Angus is selling today has its own graph. Go to www.cdnangus.ca and you can take a look at each of them.

Another Reason Why CUDLOBE BULLS are LEADING the Way in the Angus Industry

INTRODUCING

THE NEW CANADIAN ANGUS ASSOCIATION'S CANADIAN BALANCED INDEX

EPDs for new traits that are economically relevant are being developed and introduced to Canadian Angus members continuously.

Applying EPDs for all these traits into selection and breeding decisions can be challenging. Therefore, the Canadian Angus Association has worked to develop an Economic Selection Index that includes the EPDs for all traits. Traits are weighted in the index based on their economic impact on the Canadian commercial operation.

Basically, indexes help producers use EPDs to balance traits. Balancing traits can be complex. Not all traits make an equal contribution to profitability, and some traits counteract each other (e.g. post-weaning growth and cow size/feed requirements). Other traits are important to a certain threshold, then there is less benefit in going any further (e.g. calving ease) or even a direct cost (e.g. milk production).

A well-constructed index can help streamline the process of selecting cattle for breeding. It is not intended to replace individual trait EPDs (which will still be available) or to tell breeders how to breed. An index can help breeders focus on cattle that will tend to be more profitable under Canadian production systems and markets.

For the commercial producer—who likely purchases bulls and thinks about EPDs on only one day of the year—it is a useful overall guide that simplifies the complexity of multiple EPDs.

The Canadian Balanced Index will officially be launched later this year.

The index is expressed in terms of Canadian dollars and reflects the expected difference in profits between bulls' progeny.

For example:

Bull A CBI = \$250
Bull B CBI = \$150

On average, progeny from Bull A will be \$100 more profitable in a Canadian commercial operation than the progeny from Bull B.

If you have any questions about the new Canadian Angus Association Balanced Index please do not hesitate to contact CAA's Director of Science and Technology, Kajal Devani at kdevani@cdnangus.ca or 403-537-5604.

WHAT IS INCLUDED IN THE CANADIAN BALANCED INDEX:

GROWTH TRAITS

- Birth Weight EPD
- Weaning Weight EPD
- Milk EPD
- Yearling Weight EPD
- Residual Daily Gain EPD

MATERNAL TRAITS

- Calving Ease Direct EPD
- Calving Ease Maternal EPD
- Heifer Pregnancy EPD
- Docility EPD
- Mature Weight EPD
- Foot Angle EPD
- Foot Claw EPD

CARCASS TRAITS

- Marbling EPD
- Rib Eye Area EPD
- Back Fat EPD

The highest marbling bull ever produced from the Baldrige program, selling to a progressive group of Angus breeders including both the Cudlobe families. Baldrige Versatile is long and deep bodied, free moving, and up headed and he stands and moves square to the ground with good feet and base width in combination with a big spread EPD profile and excellence in all the bio-economic indexes. Sons of Versatile are the Top Sire Group at the 2023 Midland Bull Test. These 39 sons will be the only Versatile progeny available in the 2023 calving year.

It is only right to start the sale off with a full package and 90L fits that description. He is a smooth shouldered long spined expressive bull with a balanced EPD profile excelling in growth. Add to that he is the #1 residual average daily gain, in the top 1% for docility, and comes from a powerhouse of a CAA Elite dam.

Here is a calf that has not been short of friends all summer. This is the calf that we were hoping for phenotypically from Versatile with big bone a lot of thickness through the rear quarter and a front end that is smooth made and long. His Total Impact dam is a premier dam and is a cow you have to love for her depth and length of body. 99L Epd ranks in the top 10% for RADG, Docility, and Heifer pregnancy.

Here is an excellent way to finish off this first set of Versatile calves. This big rascal will add lots of jam to your cow herd. His mother is a 6B daughter outta lot 6's mother so you know this cow family puts out.

2023 was a great year to sell beef! While the beginning of the year saw some consumer push back on prices, customers were quick to pick up more secondary cuts as the summer progressed. This helped us move whole carcasses seamlessly. The farmers market at Lethbridge Exhibition Park moved to the new Agri-Food Hub midseason. Our booth location is beautiful and we look forward to the 2024 season! We are also thrilled to be part of Certified Angus Beef's Canadian launch for the Ranch to Table Program. Adding this verification will certify what our customers already know about our beef - It's the best!

If you are looking to buy full siblings here is an excellent opportunity. Uf 40F is a rock star of cow outta of the Rock. Her first calf as a heifer was our walking herd sire, Beastmode 39H and she hasn't missed a beat since. We expected very big things from this mating and these 3 bull calves didn't disappoint.

Without a doubt 2L has made many friends with his eye-catching look and impressive dimension and shape. He comes by this naturally from his CAA Elite Dam who has great depth of side, length of body and impeccable foundation at the ground. The debate around the dinner table has definitely placed her in the running as one of the greats within the herd. Top 35% Claw & Top 10% Angle EPD.

Everyone remembers the Upward calves from last year and these 3 flush brothers only add to those excellent memories. Uf 10F is what a angus cow was meant to look like and she keeps producing winners every year. Her last flush was to Growth Fund in 2021 and those 5 bulls averaged \$11,500 with all the females being retained as replacements. These bulls are like peas in a pod and are guaranteed to add to your operation.

The highest marbling bull ever produced from the Baldrige program, selling to a progressive group of Angus breeders including both the Cudlobe families. Baldrige Versatile is long and deep bodied, free moving, and up headed and he stands and moves square to the ground with good feet and base width in combination with a big spread EPD profile and excellence in all the bio-economic indexes. Sons of Versatile are the Top Sire Group at the 2023 Midland Bull Test. These 39 sons will be the only Versatile progeny available in the 2023 calving year.

The Versatile calves have stood out since they were a month old, and this calf has been at the top of the list since day 1. Lots of stretch, lots of depth and an excellent set of feet make this guy stand out phenotypically. He started off at 81lbs at birth and weaned at 908lbs coming off his first-time momma. His mother is a Ridge daughter that is giving us signs that she will be a front pasture cow moving ahead. If you're looking for a standout bull this year this guy is what you want.

146J did a heck of a job on this one weaning off over 60% of her own body weight. She is a moderate clean built female having raised a stout built soggy bull. 137 himself ranks as the #1 WW EPD of Dyce's. He is also ranked in the top 15% for his RADG, docility, and heifer pregnancy EPDs.

Now here is a calf that was bred to be a standout and boy is he doing just that. Huge growth EPD's, low Birth numbers, and all the carcass you're going to need. This guy is out of a 2 yr old Peyton daughter that is a direct daughter of Uf 40F. 40F is the stand out mother of the Beastmode 39H herd sire and lots 14,15, and 16 in this book. This cow line is doing exciting things, and this calf is a direct result of it. Don't miss out on this stand out Versatile son.

Here is a cool set of flush brothers from JB 6E and Baldrige Colonel. These 2 are like peas in a pod, would make an excellent set if you're looking for full brothers to turn out. JB 6E was beautiful moderate Rock daughter that we sent to Montana to flush during COVID allowing us to use sires unavailable in Canada and let me tell you it has left us some beautiful females. After flushing she was sold to Stevenson Angus. These 2 have caught many eyes in the pen and provide some different genetics that will work well.

We have always said our cow herd is our greatest asset and when we saw this bull's carcass data, we decided to play with him on some of our most powerful but lower carcass females. Without a doubt this worked in our favor with the calves coming at moderate BW and growing into bulls with great capacity, muscle expression and carcass merit.

As close as they come to the full package here. Check out the calving ease, and marbling EPDs paired with a smooth sided, strong top, square hipped look. 13 L is the 3rd ranked bull for marbling of all 2023 calves born in Canada. 68H is well on her way to following in her Elite dam's steps being striking to look at with an impeccable udder and foot structure.

Cudlobe Enhance 22H is easily one of the strongest Enhance sons we have raised and sold. After selling in the 2020 sale to McGillivrays' and Nicola Ranch. We decided to collect semen on him to AI heifers and younger cows. This group of sons represents our 2nd calf crop from him, and we are very pleased by their calving and performance numbers. Phenotypical he leaves them very long and thick with excellent feet underneath. These calves are ranch proven and ready for work.

Endowed is a bull we chose to use ourselves for his great growth spreads, marbling, and correct lines paired with his great foot and well-endowed scrotal circumference. With his male calves weighing in at an average of 75 lb. and birth ratio of 96 while maintaining a 100 weaning ratio on his first set of calves he proved himself to be a great calving ease sire. His dam 26G is a current donor dam with embryos being sold worldwide including to Norway. We are very excited to continue using this bull in the coming years after seeing his impressive calf crop this year.

The Canadian Angus Foundation functions to preserve and expand the Angus breed for future generations through education, youth development, scientific and market research, and historical preservation and restoration. The Canadian Angus Foundation was incorporated in 1993 and is the charitable arm of the Canadian Angus Association. Donations are tax deductible.

We are proud to support the

Canadian Angus Foundation Future 15 Program

With **YOUR** help we will continue to further our mission and the breed.

Since 2019 more than \$300,000 has been **INVESTED** in member education, awards, bursaries and youth scholarships.

\$265,000 invested in **ANGUS** research over the last six years leveraged an additional \$400,000 in grant funding.

\$70,000+ has been invested in history and archives, including the 2019 Canadian Angus history book.

If you are interested in giving back or learning more about this initiative, please contact Belinda Wagner, Canadian Angus Foundation Executive Director at 306-537-1518 or email bwagner@cdnangus.ca.

DAM OF LOT 85

www.cudlobe.com

What a year it has been for Cudlobe Angus Beef. We are very excited to recently be licensed as the only family in Canada to be labelled under Certified Angus Beef's Ranch to Table program. With only 6 licensed businesses across North America we are extremely proud to be included in this prestigious label. Our AAA / Prime steaks, roasts and various other beef products are not only fully available on our website, www.cudlobe.com, but we have continued to grow with products also being available at The Brisket Case, The Hive in Nanton, The Hive in Claresholm, and the Claresholm Pharmacy. If you are looking for Christmas presents make sure to stop in at one of these locations sale day as they carry a lot of unique homemade products alongside. We have also been thrilled to support many of our community events with not only steaks but also our pepperoni stix and jerky. It has been extremely humbling getting involved in another side of the industry; seeing our genetic decisions reflected in real data and a great many in our community able to enjoy quality beef right at home.

39H is a home raised son of Baldridge Beastmode that we kept as a walking herd sire. 39H is a high performing bull that has moderate BW numbers but explosive growth after. He was raised by a first calf Rock female that quickly entered our donor program after raising him. These calves have an excellent set of feet under them and will stand up to tough pasture conditions. 16 sons are available on sale day, and I suggest you take a look at them.

71G is who we refer to as the Limestone bull. He is an excellent Rock son that added thickness and foot structure to a already outstanding pedigree. These cows bulls have been very well received and stand up to tough conditions all the while adding pounds and carcass merit to your calf crop. Make sure you shop these 12 sons if you're looking for proven cow bull genetics.

Cudlobe Enhance 22H is easily one of the strongest Enhance sons we have raised and sold. After selling in the 2020 sale to McGillivrays' and Nicola Ranch. We decided to collect semen on him to AI heifers and younger cows. This group of sons represents our 2nd calf crop from him, and we are very pleased by their calving and performance numbers. Phenotypical he leaves them very long and thick with excellent feet underneath. These calves are ranch proven and ready for work.

There are just some bulls that have style from the start and this is one. 72L is not only ranked to have the best Claw and Angle EPD in sale, but he is very stylish through his front third with a table top, and great muscle expression. His 9-year-old dam owes us nothing as she still stands strong in her lines with great depth of flank and foot.

The highest marbling bull ever produced from the Baldrige program, selling to a progressive group of Angus breeders including both the Cudlobe families. Baldrige Versatile is long and deep bodied, free moving, and up headed and he stands and moves square to the ground with good feet and base width in combination with a big spread EPD profile and excellence in all the bio-economic indexes. Sons of Versatile are the Top Sire Group at the 2023 Midland Bull Test. These 39 sons will be the only Versatile progeny available in the 2023 calving year.

CUDLOBE INFLUENCE

Feeder Sale 2023

Monday October 3, 2023 marked a very special day in the Beef Business for

CUDLOBE ANGUS

and some of their customers.

2023 was the 10th anniversary of the Cudlobe influence feeder calf Sale. The criteria to be part of the sale is that 50% of the calves must be Cudlobe Angus sired. this year there were 2500 calves featured in the sale from Sheppard Creek Ranch, Matt and Addie Bolduc - Cudlobe West Niznik Ranches, Torkelson Farms, Roy & Karen Hall, Randy Hitchcock, Curtis, Heather, Jamie and Stephanie Harbinson and the Giles Ranch. Sale Took Place October 2 as it has been in the chosen date for the last few years selling the first week of October. Over the last five years, there has been an increasing desire for these genetically influenced calves, which is evident in the repeat customers coming back to purchase year after year. responses from buyers have been extremely valuable in them sharing that these calves are healthy and perform extremely well on feed. The calves have been showing a premium between \$.05 and \$.10. Based on can fax averages that week consistently over the last number of years. The commitment of these ranchers to continue to participate in the sale is amazing and it's an absolute privilege to be part of it. This is the longest running genetically influenced sale in North America. The quality of these calves is extremely apparent Due to the repeat customers competing for them year after year. This group of ranchers is dedicated and committed to delivering the best of the best to the buyers. These are a tight group of individuals sharing a common goal, of providing this high quality well performing Calves. As we look to the future, we know the margins are thin in this industry, so it becomes increasingly more important to purchase quality cattle that perform. On behalf of all of us at Foothills Auctioneers, it's a privilege and an honour to work with Cudlobe Angus and the producers that raise these amazing cattle, and we look forward to much more continued success. **Rob Bergevin**

Congrats to our Customers!!

- Roy & Karen Hall
- The Niznik Family
- The Giles Family
- Curtis, Heather, Jayme & Stephanie Harbinson
- Randy Hitchcock
- Torkelson Farms
- Shepard Creek Cattle Co.
- Cudlobe West - Matt & Addie Bolduc

There are a few that who have marketed their cattle successfully as Cudlobe Influenced that we would like to acknowledge including:

- Cross Cattle Compnay
- Duckworth Ranches
- Schneider Ranches

Genomic Percentile Ranks

Definition of Traits

Calving Ease Direct (CED)

Is an indicator of an animal's genetic potential for unassisted births in first-calf heifers. Animals in the top 20th percentile of the breed indicate more direct calf calving ease than animals in the bottom 80th percentile.

Mature Height (MH)

Characterizes the genetic potential for mature cow height at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in frame or hip height than animals in the bottom 80th percentile.

Heifer Pregnancy Rate (HP)

Is used as a tool to increase the chance of a sire's daughters becoming pregnant during a normal breeding season. Animals in the top 20th percentile of the breed indicate more probability of daughters becoming pregnant at first exposure than animals in the bottom 80th percentile.

Birth Weight (BW)

Measures genetic potential for calf weight at birth. Animals in the top 20th percentile of the breed indicate lighter birth weight calves than animals in the bottom 80th percentile.

Calving Ease Maternal (CEM)

Characterizes an animal's potential for unassisted births in first-calf daughters. Animals in the top 20th percentile of the breed indicate fewer assisted births in first calf heifers than animals in the bottom 80th percentile.

Carcass Weight (CW)

Is a genetic predictor of hot carcass weight as measured at harvest time. Animals in the top 20th percentile of the breed indicate more pounds expressed than animals in the bottom 80th percentile.

Weaning Weight (WW)

Is a measure of genetic potential for calf weight at weaning. Animals in the top 20th percentile of the breed indicate more pounds of weaning growth than animals in the bottom 80th percentile.

Milk (MILK)

Is a measure of milk and mothering ability as expressed in daughters. Animals in the top 20th percentile of the breed indicate more pounds of weaning weight in calves through the dam's milking and maternal ability than animals in the bottom 80th percentile.

Fat Thickness (FAT)

Is a predictor of the differences in external fat thickness as measured between the 12th and 13th carcass ribs. Animals in the top 20th percentile of the breed indicate less back fat cover than animals in the bottom 80th percentile.

Yearling Weight (YW)

Describes an animal's potential for calf weight at one year of age. Animals in the top 20th percentile of the breed indicate more pounds of post weaning growth than animals in the bottom 80th percentile.

Scrotal Circumference (SC)

Is a measure of genetic potential for scrotal circumference, a predictor of bull fertility. Animals in the top 20th percentile of the breed indicate more yearling scrotal size than animals in the bottom 80th percentile.

Ribeye Area (REA)

Characterizes an animal's genetic potential for ribeye area. Animals in the top 20th percentile of the breed indicate more ribeye area than animals in the bottom 80th percentile.

Yearling Height (YH)

Characterizes an animal's genetic potential for height or frame. Animals in the top 20th percentile of the breed indicate larger frame size than animals in the bottom 80th percentile.

Docility (DOC)

Is an animal's genetic potential to be extremely calm, or to have calm offspring. Animals in the top 20th percentile of the breed indicate more docile animals than animals in the bottom 80th percentile.

Marbling (MARB)

Is an expression of the potential to improve marbling score, which is used to predict Quality Grade in beef cattle. Animals in the top 20th percentile of the breed indicate more marbling and greater potential to grade AAA than animals in the bottom 80th percentile.

Mature Weight (MW)

Is an expression of genetic potential for mature cow weight at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in pounds than animals in the bottom 80th percentile.

Tenderness (TND)

Represents the genetic potential for tenderness as measured by the Warner Bratzler shear force test. Animals in the top 20th percentile of the breed indicate more tenderness than animals in the bottom 80th percentile.
